Illinois PACE History

In 2003, Illinois added PACE as a Medicaid State Plan service. The first "pre-PACE" program was operated by Chicago REACH and sponsored by Sacred Heart Hospital. It did not reach certification as a full-PACE site and operation was discontinued in 2012/2013 for reasons unrelated to PACE.

SB 2294 / P.A. 102-0043 required HFS to pursue the implementation of PACE.

ILLINOIS PACE VISION

Goals for Illinois

- Improve health and wellness for individuals and communities
- Tailor solutions to meet the unique needs of individual communities
- Support healthcare delivery models that improve outcomes, decrease disparities, and are sustainable over time
- Align the PACE program strategy with the other HFS initiatives related to healthcare transformation.

OPEN DISCUSSION

BoldAge PACE Promise

To help older adults live a meaningful, independent life at home, with grace and dignity.

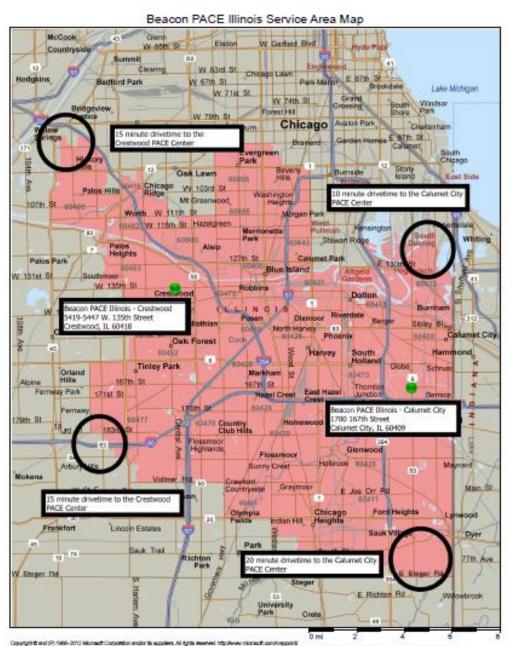

We do this by providing holistic care to address the physical, behavioral, and social well-being of older adults and creating the greatest opportunity for them to live happily and healthily in their own homes for as long as possible. **Bold**Age

The independence you want. The care you need.

BoldAge PACE Illinois center locations:

PACE "EYE" is Essential

- The PACE IDT manages a *small* group of participants.
- IDT members get to *know* participants well.
- Issues are addressed *early and effectively*.

Example: A participant's driver notices that she's limping as he helps her to the van in the morning. The driver passes that information on to the clinic nurse and physical therapist who evaluate her injury and start her on a rehabilitation protocol that day!

The independence you want. The care you need.

Kinship Health

To improve and increase access to PACE programs by developing Kinship PACE into a national platform and by supporting existing PACE Programs to achieve their mission in local communities.

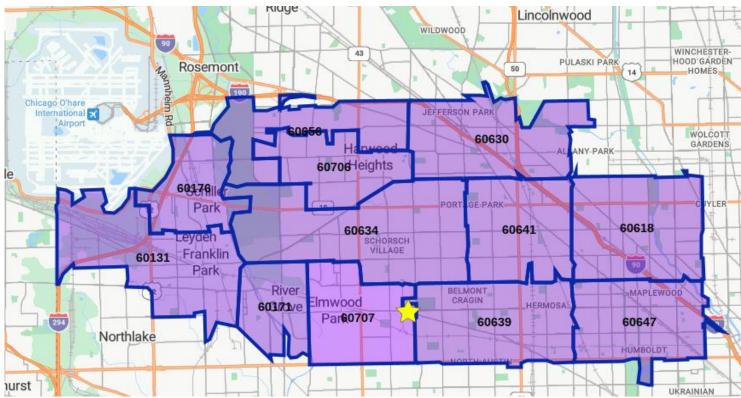

Kinship PACE

Our mission is to enhance quality of life and foster independence among older adults in the community through partnership with them, their families, caregivers, and healthcare providers. Our model of care prioritizes patient-centered decisions, along with high quality, personalized, ethnically, and culturally sensitive care and services to enhance the overall health of the community.

Kinship's Core Values

As we looked to differentiate our approach as a PACE program, we wanted to find a way to simultaneously increase participants' access to care and overall satisfaction while helping improve the overall communities where our participants reside.

In each of our markets, we actively seek to identify Community Partners such as Care Coordination Units, housing providers, health systems, behavioral health centers, churches, shelters, federally qualified health centers, and other not-for-profit organizations with the goal of improving the quality and access of services for the broader community.

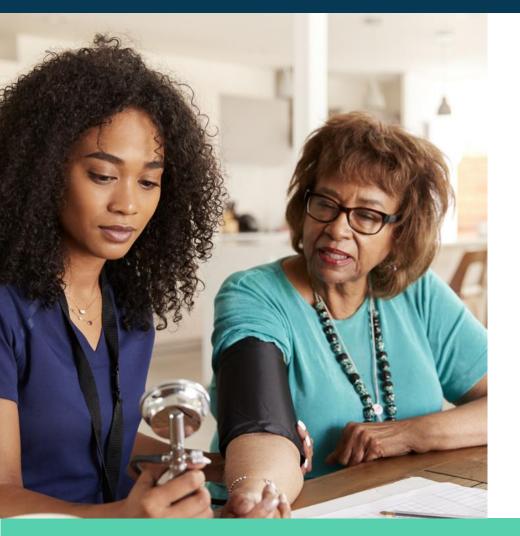

We believe that this can be achieved through Kinship's core values:

Kinship Health helps enable older adults to age gracefully and delivers high quality care at the right time in the right setting.
